PROFESSIONAL SUMMARY

Data Analyst and analytics professional with hands on experience in data analysis, dashboard development, database reporting, and business intelligence support across telecom, education, and corporate environments. Strong in collecting, cleaning, transforming, and analyzing data to generate actionable business insights and management reports. Practical exposure to Power BI, SQL, Excel, Python, and analytics workflows, with experience supporting KPI monitoring, reporting automation, and data driven decision making. Backed by an MSc in Data Science and a strong foundation in mathematics, analytical thinking, and communicating insights to both technical and non technical stakeholders.

PROFESSIONAL EXPERIENCE

Associate Software Engineer - Data Analytics & Reporting 2026

2025 -

Aviha Group of Companies, Colombo 04, Sri Lanka

- Developed interactive Power BI dashboards for management reporting across multiple business units, improving visibility of operational and commercial performance.
- Collected, cleaned, and transformed datasets from internal systems to support accurate analytics, reporting, and decision making.
- Wrote SQL queries and supported relational database maintenance for recurring reports, ad hoc analysis, and data extraction needs.
- Prepared visual reports and business insights to support management reviews, KPI tracking, and performance analysis.
- Maintained data accuracy, validation controls, and appropriate access management within reporting environments.

Trainee Lecturer 2025

2023 -

Java Institute for Advanced Technology, Pilimathalawa, Sri Lanka

- Conducted lectures for undergraduate students in mathematics related subjects relevant to computer science and analytical problem solving.
- Supported curriculum development by updating teaching content in line with student needs and relevant subject developments.
- Prepared lecture notes, presentations, and supplementary materials to improve learning support and classroom delivery.
- Created and evaluated exam papers to assess subject understanding, knowledge retention, and academic performance.

Data Science Intern

2023

Sri Lanka Telecom PLC, Colombo 01, Sri Lanka

- Analyzed large datasets to identify patterns, trends, and business insights relevant to operational and commercial decisions.
- Performed data cleaning, preprocessing, and transformation to improve data quality for analytics and modelling workflows.
- Supported the development of analytical models and reporting outputs used in data driven decision making.

- Collaborated with cross functional teams to integrate analytics outputs into business and operational processes.

EDUCATION

- **MSc in Data Science** **2023 - 2025**
Coventry University, United Kingdom
- **BSc. in Statistics and Computer Science** **2019 - 2023**
University of Kelaniya, Sri Lanka
- **G.C.E. Advanced Level - Mathematics Stream** **2017**
Dharmaraja College, Kandy, Sri Lanka

CORE COMPETENCIES & SKILLS

- **Databases&Querying** - SQL, MySQL, relational databases, data extraction, query writing, reporting support
- **Spreadsheet&Office Tools** - Microsoft Excel, data processing, structured reporting, presentation support
- **Programming for Analytics** - Python, R, Pandas, NumPy, Matplotlib, machine learning project exposure
- **Professional Skills** - Analytical Thinking, Communication, Attention to Detail, Problem Solving, Teamwork, Data Driven Decision Support

PROJECTS

Interactive Power BI Dashboard for Analyzing Restaurant Ratings **2024** Coventry University

- Created an interactive Power BI dashboard to analyze factors influencing restaurant ratings, combining data preprocessing with effective visualization design.
- Used Power BI, Python, Excel, and DAX to transform data into clear business intelligence outputs and analytical insights.

Predictive Modeling for Income Classification Using the UCI Adult Income Dataset **2024** Coventry University

- Developed a machine learning model to classify income levels using demographic and socio-economic variables.
- Performed data preprocessing and exploratory data analysis, and used TPOT AutoML to support model optimization and evaluation.

Currency Exchange Rate Forecasting **2023** SLT Digital Lab

- Developed a Python based forecasting model using historical exchange rate data to support time series prediction.
- Applied the ARIMA model to improve forecasting accuracy and demonstrate practical capability in financial data analysis.

Market Basket Analysis for Retail Data **2023** SLT Digital Lab

- Conducted retail data analysis to identify purchasing patterns and relationships in transactional datasets.

- Generated actionable insights to support product placement, cross selling opportunities, and customer behavior understanding using the Apriori algorithm.
